# Docking Stations
Made for the Future of Education

The eruption of COVID-19 required many teachers, parents, and students to rapidly adjust to new modes of learning. Globally, around 87% of the world's population have been affected by school closures, resulting to remote learning.[1] This increased digital implementation into classrooms to make teaching and learning more accessible for anyone from anywhere.
As education leans to a hybrid structure, teachers and students need to be prepared to cater for a more digital presence. But what does this look like?

HP offers a range of versatile docking setups, tailored specifically for education that allow for more agile teaching, bridging the gap between portability and having a stationary place to work.

4 ways to set up for remote teaching:

What makes HP Docking Stations so popular?

Seamless teaching with hassle-free connecting to laptop

One hardware piece only

6+
Longer life span of 6 years

Cost and time efficient
