

Senior Living

Providing solutions to keep facilities safe, while fostering collaboration between staff, residents, and families.

Senior Living, Assisted Living, long-term care, and hospice facilities face many challenges unique to their variety of services and types of properties. These include care management, providing a safe and secure environment, and providing effective communication between staff, residents, and families. New Era Technology has the solutions and experience to help these facilities with a full spectrum of solutions designed to meet the specific needs of these communities.

Solutions & Services

HIPAA Compliant IT:

- Network infrastructure
- Cloud-hosted and on-premise services
- Secure back-up and disaster recovery

Professional Services

- Managed IT services and consulting
- Workforce and staff augmentation

Solutions

Healthcare Communications: Nurse and patient communications, wander management, wireless duress pendants, and staff, asset, and patient tracking technologies to improve care and work-flow.

Audio Visual Integration: Collaboration and efficiency through paging, large group sound reinforcement, boardroom, electronic whiteboards, digital signage, and privacy technologies.

Physical Security and Life Safety: New Era Technology takes a holistic approach when reviewing threats and ensuring the safety of an organization's environment. Visitor management, access control, security, video surveillance, and temperature screening are just a few state-of-the-art solutions New Era can provide to keep your facility focused on providing quality care.
