Vulnerability Assessment as a Service
DATA SHEET

Continuously detect and protect against attacks, anytime, anywhere. New Era Technology provides CloudBlu Vulnerability Assessment as a Service (VAaaS) solutions that automate the full spectrum of auditing, compliance and protection of your IT systems and web applications.

Vulnerability Management

Gain immediate, and global visibility into where your IT systems might be vulnerable to the latest Internet threats and how to protect them. It helps you to continuously identify threats and monitor unexpected changes in your network before they turn into breaches.

2-Second Visibility
Gives you full clarity into your data center assets, identifies their vulnerabilities, prioritizes remediation and assesses IT compliance

Continuous, Comprehensive Protection
Continuously monitors your environment, and flags traffic anomalies

Accurate, Prioritized Results
Features a powerful data analysis, correlation and reporting engine

Lower and More Predictable TCO
No capital expenditures, extra human resources or infrastructure or software to deploy and manage.

To learn more about subscription options and application features email solutions@neweratech.com.

Web Application Scanning

Automated crawling and testing of custom web applications to identify vulnerabilities including cross-site scripting (XSS) and SQL injection. The automated service enables regular testing that produces consistent results, reduces false positives, and easily scales to cover thousands of websites to monitor websites for malware infections, to help prevent blacklisting and brand reputation damage.

Clarity and control
A single interface lets you identify, manage and fix all web app vulnerabilities and misconfiguration.

App Dev Hygiene
Integrates with the software development lifecycle allowing scans at any time by developers, QA and security teams, as well as automating scans in DevOps and CI/CD pipelines.

Broad Threat Coverage
Detect, identify, assess, track and remediate OWASP Top 10 risks, WASC threats, CWE weaknesses, and web-based CVEs.

Policy Compliance

Automate security configuration assessments on your IT systems, whether they're on-premises, remote, or in the cloud. It helps you to reduce risk and continuously comply with internal policies and external regulations.

Lower Costs and Complexity
Scan more systems, with less effort, and without the overhead of an on-premises solution

Accurate, Prioritized Results
Find and prioritize configuration lapses to help you achieve, document, and remain continuous compliance.

Flexible and Extensible
Integrates into your processes by sharing configuration data with your VM program, GRC applications, and ticketing and help desk systems, allowing you to centralize information and assign tasks.

Instant, Comprehensive Visibility
Displays security configuration issues accurately and in one place, so you have continuous visibility of your security risk posture.

Vulnerability Assessment as a Service is part of CloudBlu, New Era's "As a Service" portfolio of cloud services.
